Albania power energy group

Who produces the most electricity in Albania?
The Albanian Power Corporation (KESH)is the public producer and,at the same time,largest electricity producer in Albania. KESH operates the most important electricity generating plants in the country.

Does Albania have a hydro power plant?
Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable. The total installed generation capacity has increased over the last few years because of new private investments in hydro power plants and more recently in small solar farms.

Does Albania have a power supply security problem?
Albania is a net importer of electricity; power supply security is a challenge. Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable.

When did Albania adopt a new power sector law?
Based on this treaty,Albania adopted in 2015a new Power Sector Law (no.43/2015),which transposes the EU Directive 2009/72/EC of 13 July 2009,concerning common rules for the internal market in electricity and repealing Directive 2003/54/EC.

What is the role of Kesh in Albania's energy system?
By operating 79 per cent of the generation capacity in the country,KESH supplies about 70-75 per cent of customers' demand for electricity,provides the energy needed to cover losses in the transmission grid and guarantees the securityof the Albanian energy system through balancing energy and auxiliary services.

What power plants does Kesh manage?
KESH manages the main electricity production plants in the country. These assets consist of the Drin Cascade hydropower plants(HEC Fierze,HEC Koman and HEC Vau i Deja) with an installed capacity of 1,350 megawatts (MW),and TEC Vlora with an installed capacity of 98 MW.
