Andorra solenco power

Who is solenco power?

Our company: discover more about our CEO and our team! Founded in 2015, and with a team with +50 years of experience in the hydrogen sector, Solenco Power is committed to the decarbonization of the energy sector. Dr. Hugo Vandenborre is the President and CEO of Solenco Power NV.

Why should you choose solenco?

Hydrogen can do that. At Solenco we believe in the power of green hydrogen to bring us to a sustainable solution for our energy demands. Only oxygen as side product, no CO 2 emission ! Solenco specializes in hydrogen energy storage systems for residential, commercial & industrial installations. With Solenco we go for endless renewable energy!

Will the solenco Powerbox be a disruptive technology?

"I,doctor Nicolas Brahy,representing Hydrogen Europe,will support the developing of the Solenco Powerbox,since it can be seen as a disruptive technologyfor bringing more renewable energy in the European Energy mix and paving the way for introducing hydrogen technology in our daily live."

What is a solenco Powerbox?

The Solenco Powerbox is a so-called µCHP (micro combined heat and power device) that supplies both electricity and heat. In most situations,the Powerbox alone will not provide sufficient heat output to heat up a building completely. That is why a connection with a heating system,eg a heat pump,is recommended.

How powerful is solenco vs Powerbox?

Solencowill be powerful to commercialize,since it has comparable cost to existing inferior solutions,and has the fastest return on investment (<3 years) of any storage solution on the market. Powerbox is targeted at the EU-28 residential renewable energy market of EUR33.6B (2016),which continues to grow rapidly.

SOLENCO POWER NV | 1.699 volgers op LinkedIn. Endless Renewable Energy | The Solenco Powerbox is an energy storage system based on hydrogen tech. It is charged by electrical power from a renewable source (typically solar PV) and returns both heat and electrical power. It is the missing link between residential needs and the given solar system.

is an energy storage system based on hydrogen tech. It is charged by electrical power from a renewable source (typically solar PV) and returns both heat and electrical power. It is the missing link between residential needs and the given solar system.

By 2030 Borkum, an island in the North Sea on the German North-West coast, aims to become fully decarbonised. As part of the EU-funded Islander project Solenco Power will deploy a 25 kW Solenco Energy Box. The Solenco Energy Box stores renewable energy when the demand is low and then supply the energy during peak consumption periods.

Über Solenco Power: wie wir sind und was wir machen. Entdecken Sie unser Unternehmen, unseren CEO, unser Team und unsere Neuigkeiten und Publikationen

Ziel des von der EU finanzierten Projekts Powerbox ist die Vermarktung der von Solenco Power NV entwickelten innovativen Energiespeicherlösung. Mit der Solenco Powerbox können Privathaushalte und kleine Unternehmen ihre selbst erzeugte Energie kostengünstig speichern, für Stunden oder für die komplette Saison.
