Armenia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Let us solve your energy challenges and exceed your environmental goals. No fees or obligation until you say we"ve found the right solution for your organisation. If your organisation delivers industry leading services in the energy sector or if you"d like to ...
