Armenia bmg power systems

How does Armenia produce electricity?

Armenia lacks fossil energy source,and heavily relies on the production of electricity from a nuclear power plant and hydro power plants,and uses imported fossil fuels to operate thermal power plants. Solar energy and wind energy productions are just a small portion of the overall electricity production.

Does Armenia have solar power?

In June 2016,the Armenian Parliament updated the law "On Energy Saving and Renewable Energy" which encourages the use of solar powerin the country and allows users of solar installations of 150 kW or less to sell their excess energy back to the electrical grid. The voltage in Armenia is 220 V AC at a frequency of 50 Hz.

What is the electricity sector in Armenia?

The electricity sector of Armenia includes several companies engaged in electricity generation and distribution. Generation is carried out by multiple companies both state-owned and private. In 2020 less than a quarter of energy in Armenia was electricity.

Does Armenia have a nuclear power plant?

Nuclear power provides 38% of the electricity in Armenia through one operating nuclear reactor,Unit 2 of Metsamor Nuclear Power Plant,which is a WWER-440 reactor with extra seismic reinforcement. It was created in 1976 and is the only nuclear power plant in the South Caucasus.

Will Armenia cut back on use of natural gas for electricity?

The plant will reportedly allow Armenia to considerably cut back on use of natural gas for electricity production,because officials say it will also be twice as efficient as the plant's decommissioned unit and four other Soviet-era facilities of its kind functioning in the central Armenian town of Hrazdan.

What voltage does Armenia use?

The voltage in Armenia is 220 V ACat a frequency of 50 Hz. Armenia uses the European 2-pin C-socket and F-socket plugs. According to International Energy Agency in 2015 electricity generation in Armenia increased since 2009 to nearly 8000 GWh,but still remains below 1990 levels.

On November 21, the Armenian government approved an energy project to construct a new 400 kV power transmission line to Iran. The project, financed through a state budget loan, will increase electricity transmission capacity between the two countries from 350 MW to 1,200 MW.

Earlier, BMG reported, Armenia has decided to extend the operation period of its nuclear power plant until 2036. The Armenian NPP is the only nuclear power plant in the ...
