Armenia energy factory kft

Where does Armenia get its energy from?
Lacking indigenous resources,Armenia imports natural gas and oil for most of its energy needs (78.6% of total energy supply in 2020),mainly from the Russian Federation(hereafter,"Russia").

How much energy does Armenia import?
il fuels need to be imported. Natural gas represents the largest - 76.3% share of Armenia's energy imports (2.45 mln toe),followed by oil roducts 22.6% (0.73 mln toe). Armenia exports ctricity in 2022,of which by0.79 nuclear power plant (31.0%),natural gas fired thermal power plants (42.2%),hydro power plants (21.1%) and wind and

What is the energy mix in Armenia?
solar 0.68 plants (5.7%).Although Armenia's energy mix is dominated by gas,the electricity mix is well diversified in compar OTAL FINAL EN rgyconsumpt portmethodology.ResidentialThe households are the main and largest final consumers of energy (34.7%),includi

How has Armenia restructured its energy sector?
Prompted by a severe electricity supply crisis in the mid-1990s, Armenia has revamped its energy sector over the past 20 years. Parts of the sector have been privatised, some companies have been restructured, most households now have access to gas, and cost-reflective tariffs have been introduced.

Does Armenia have solar power?
In June 2016,the Armenian Parliament updated the law "On Energy Saving and Renewable Energy" which encourages the use of solar powerin the country and allows users of solar installations of 150 kW or less to sell their excess energy back to the electrical grid. The voltage in Armenia is 220 V AC at a frequency of 50 Hz.

Why does Armenia need a single energy supplier?
Armenia relies on imports of natural gas and oil for most of its energy needs,which exposes it to supply risksand dependence on a single supplier. As the government considers energy security and the development of indigenous sources to be of prime importance for the energy sector,renewables and efficiency measures are key areas.
