Aruba expro energy

Where does Aruba get its electricity from?
Aruba currently gets 15.4% of its electricity from renewable sources. The island has sufficient renewable energy resource potential,with excellent technical potential for ocean,wind,and solar renewable energy generation.

What is the cost of electricity in Aruba?
The energy landscape of Aruba,an autonomous member of the Kingdom of the Netherlands located off the coast of Venezuela,is outlined in this profile. Aruba's utility rates are approximately $0.28 per kilowatt-hour (kWh)*\(below the Caribbean regional average of $0.33/kWh\).

Who is Expro energy services?
For clients working across the entire well life cycle,Expro is the visionary full-cycle energy services expertoffering novel,insightful solutions,dependable competency and award-winning safety.

How much energy does Aruba consume annually?
Aruba has an annual consumption of 990 gigawatt-hours (GWh). Currently,about 13% of its generation comes from a 30-MW wind project and 0.9% comes from waste-to-energy (WTE) biogas. An additional renewable capacity of 34 MW is planned or in progress. Aruba's installed generation capacity is 230 megawatts (MW) with an average load of 100 MW.

What can Expro do for You?
A client in Colombia was eager to produce cleaner energy, and Expro provided a solution that monitored and collected accurate, representative samples from the surface down to a depth of approximately fifteen feet.

Does Aruba aim for sustainable development?
Aruba has announced its commitment to sustainable development,as stated in the 2011 document titled "The Green Gateway". During the Rio +20 United Nations Conference on Sustainable Development in 2012,the country declared its goal to achieve 100% renewable energy useby 2020.
