Bahamas sun storagetek 6100

What is the Sun StorageTek storage domain?

The Sun StorageTek Storage Domain is a premium feature. Licenses are available for 8,16,or 64 storage domains. You can determine the number of configurable storage domains by obtaining the appropriate license. Click Sun StorageTek Common Array Manager. The navigation pane and the Storage System Summary page are displayed.

Does Sun StorageTek 2500 support SSD?

For the Sun StorageTek 2500 Series storage arrays, you can use Serial Attached SCSI (SAS) disk drives. The Sun Storage 6580 and 6780 arrays support solid state drive (SSD) as a premium feature for both 73 GB and 300 GB capacities. You can install SSDs in the same tray as FC or SATA drives, up to a maximum of 20 SSDs per array.

How do I enable storage domains in Sun StorageTek common array manager?

Click Sun StorageTek Common Array Manager. The navigation pane and the Storage System Summary page are displayed. From the navigation pane,expand the array for which you want to enable additional storage domains. The navigation tree is expanded for that array. Expand Administration and choose Licensing.

How many MB is a Sun StorageTek access volume?

Automatically created,it uses LUN 31 (except for the Sun StorageTek 6130 array) and consumes 20 MBof storage space not available for application data storage. Access volumes are listed on the Mapping Summary page. Once a volume has been created,the following tasks can be performed based on volume type,as shown in TABLE 3-15.

How do I register an array in Sun StorageTek?

Click an array name to see the array details. TABLE 2-5 describes the buttons and fields on the Storage System Summary page. Click to launch the Register Array wizardto designate a new storage system to be managed by the Sun StorageTek Common Array Manager software. Click to remove the selected array from the registry.

What is Sun StorageTek common array?

The management software,labeled Sun StorageTek Common Array in the browser user interface (BUI),provisions and maintains the storage for data hosts. are collections of volumes that share a profile defining the common configuration of the volumes. Storage profiles define the characteristics of a storage pool.

Vibrant Technologies offers the SUN CSM200 for sale, a Disk Drives option and we buy and sell new and used Server Components equipment and parts at deep price discounts off the SUN list pricing.

Worked at the StorageTek office in Ann Arbor, Michigan in the late 90"s. We had one or two of these huge tape libraries in our office, which was super cool. Sadly this was right in the era where Linux was really gaining steam in the Enterprise, so while StorageTek once supported dozens of different platforms, the company had whittled support ...

The Sun StorageTek Common Array Manager software provides you with an easy-to-use interface to configure, manage, and monitor Sun StorageTek storage arrays. New features in Release 6.0.0: Enhancements to Auto Service Request (ASR) functionality Support for Sun StorageTek FLX240, FLX280, and FLX380 Arrays Changes in the firmware update procedure.

I got to design and build out an environment with Ultra 40s and 20s like in the original post for dev systems, and in prod land there were multiple X4500 "Thumper" boxes, X4200s, even a bunch of the "CoolThreads" SPARC T2000 and T1000 boxes. All hooked up to Sun StorageTek SAN at 4GB over Brocade switches.

The SUN StorageTek 6140 is a 4Gbps Fibre Channel SAN solution. The controller tray features (16) 3.5" drive slots for both high performance 10K / 15K FC disk drives operating at 2 or 4 Gbps or high capacity SATA drives for near-line storage.
