Bangladesh nexon energy

Can Bangladesh learn from the energy transition?
Bangladesh's trajectory towards energy transition has been challenging but also provides valuable opportunities for other countries to learn from it. Even though Bangladesh contributes only 0.56 percent to global greenhouse gas emissions,it ranks as the seventh most vulnerable nation to the impacts of climate change.

Why is Bangladesh a leader in nature-based solutions?
Bangladesh has emerged as a trailblazer in adopting nature-based solutions (NbS) to supplement the impact of energy transition and address the challenges of climate change,exemplified by initiatives like mangrove restoration,floating agriculture,and community-based forest management.

Will Bangladesh achieve complete decarbonization by 2050?
Worldwide, there is increasing focus on the energy transition, which entails achieving complete decarbonization of the global energy system by 2050. Situated in the Global South, Bangladesh encounters substantial challenges as it grapples with the consequences of climate change.

Will ExxonMobil negotiate on offshore blocks?
Bangladesh Oil,Gas and Mineral Resource Corporation (Petrobangla) Chairman Zanendra Nath Sarker said,"ExxonMobil has placed a primary proposal to negotiate on offshore blocks in deep-sea as well as for some onshore blocks. "The proposal is now under consideration."

Does ExxonMobil want a direct negotiation proposal?
In its proposal,ExxonMobil has expressed interest in direct negotiationfor mutually acceptable PSCs covering all open deepwater blocks,data access for evaluation of selected onshore blocks needed for direct negotiation proposal,and participating in the planned tender for the offshore blocks.

Will ExxonMobil explore a deepwater offshore block?
Picture taken May 15,2021. REUTERS/Kathleen Flynn/File Photo/File Photo ExxonMobil Corporation,one of the world's largest oil and gas companies,has expressed interestin exploring gas in all the open deepwater offshore blocks and some onshore blocks using the required two- and three-dimensional seismic surveys.
