Modern architecture in Gabon focuses on sustainability and the revival of traditional designs. These trends reflect the country"s unique blend of modernity and cultural heritage. Sustainable Building Practices. Gabon has embraced sustainable building practices. This means using energy-efficient designs that reduce the environmental impact.

A BESS is typically comprised of battery cells arranged into modules. These modules are connected into strings to achieve the desired DC voltage. The strings are often described as racks where the modules are installed. The collected DC outputs from the racks are routed into a 4-quadrant inverter called a Power Conversions System (PCS).

Battery Energy Storage Systems (BESS) Definition. A BESS is a type of energy storage system that uses batteries to store and distribute energy in the form of electricity. These systems are commonly used in electricity grids and in other applications such as electric vehicles, solar power installations, and smart homes.
