Centiel cumulus power Germany

Why should you choose centiel scalable modular UPS?
Compared to a standalone UPS solutions or centralised bypass architectures,Centiel's scalable modular UPS have a lower total up-front investment cost,allowing you to grow your power protection capacity as your demand increases.

Why should you choose cumuluspower TM modules?
Thanks to our long experience in module-design, the Cumuluspower TM modules are equipped with all hardware (power circuits) and all software (intelligence and monitoring) functions, which make them fully independent and capable of safely isolating themselves from the multi-module system whenever an internal fault occurs.

How many types of frames does centiel offer?
Centiel's flexible solution approach can customize a frame solution to satisfy specific needs. Centiel has provided 14 different typesof frames with each particular number of modules designed for your needs. requirements? Contact us directly if you have any questions regarding our products. Maximum Protection with Competitive Price.

StratusPower is a three-phase modular UPS that covers the power range from 10 to 1,500 kW in one cabinet and can be paralleled for 3,750 kW of uninterrupted clean power.. Designed and manufactured in Switzerland, StratusPower"s superior topology, DARA, ensures full availability with no single point of failure, providing data center operators with complete peace of mind.

Each module is a complete UPS. Thanks to Centiel"s long experience in module-design, the CumulusPower (TM) Intelligent Modules are equipped with three independent power converters, one static bypass, all hardware and all software (intelligence and monitoring) functions, making them fully independent and capable of safely isolating

Another challenge was educating the user about traditional Modular UPS systems" potential single points of failure. Explanations were provided to emphasize the importance of power protection, and it was evident that Centiel UPS, with its redundancy and "9 nines" (99.9999999%) availability, was the ideal choice for the critical load. Impact
