Corvus energy bergen Vatican City

The battery factory in Bergen will supply Corvus" largest market--the growing European market--and contribute to employment in Bergen and across Northern Europe. Built on time and on budget, the factory comprises a robotized and digitized production line with nine robotic stations and a capacity of up to 400 megawatt hours (MWh) per year.

Corvus Norway AS is at the forefront of a new trend in the marine industry, the adaptation of hybrid-electric propulsion technology. Hybridized vessels provide ship owners with a rapid return on investment with immediate savings in fuel and maintenance costs and significantly reduced emissions.

Corvus Energy has taken a significant step towards sustainability by shifting from international to local sourcing for a vital plastic component used in battery production. This new partnership ...

Corvus Energy has announced that contracts for the location and production equipment for its new fully automated battery production factory in Bergen, Norway have been finalized and signed. The new facility will be situated at Midtun in Bergen, about one mile (1.6km) south of the city center.
