Energy Minister George Papanastasiou on Thursday presented the EUR30 million scheme aiming to increase the use of photovoltaic panels in Cyprus which will in turn reduce home electricity bills.

Cyprus photovoltaics panels

We only choose the best solar panels in the market to install in our photovoltaic systems in Cyprus. Our solar panels are carefully selected for their high-quality and efficiency and this is why we choose to install QCells solar panels in Cyprus, to offer our customers maximum energy production and long-term savings on electricity bills.

Look no further than SavingPro Ltd. We specialise in providing high-quality photovoltaic panels and systems tailored to meet your energy needs. As one of the leading photovoltaic companies in Cyprus, we are dedicated to offering top-notch products, professional installation services, and comprehensive maintenance solutions.

Introducing photovoltaic energy panels. Over the last few months photovoltaic energy panels have become increasingly popular. When photovoltaic was first talked about, no one took much notice, because our solar panels were doing a good enough job. However, since the war in Ukraine, the Cypriots have become interested in using these systems.

In Cyprus, photovoltaic systems are particularly suitable because of the great sunshine we have for the most months of the year. Each solar system consists of a number of solar panels, depending on the surface available for installation. Generated electricity can be stored in batteries for future use at times of low sunshine or at night, or be ...

Residents of Cyprus who haven"t installed any other PV systems with any other Government Grant Scheme are entitled to apply for a non-residential solar panel project, and the panels can be installed either on the roof of the applicant"s premises or on the ground. The contract between the producer and the EAC lasts 10 years.

The applications for these four support schemes in Cyprus must be submitted by 20/12/2023 or until the exhaustion of the available budget. Category 3A Installation of a photovoltaic system using the Net Metering or Virtual Net Metering method in existing dwellings.

PV panels are an example of a green energy technology producing clean electricity converted from direct or indirect sunlight without any moving parts. PV panels produce DC electricity through their solar cells which convert energy ...

The company covers the whole range of services in the field such as: study, import, distribution, installation, supervision and maintenance of photovoltaic systems, is a member of the Energy Foundation and is registered with the Association of Companies of Renewable Energy Sources of Cyprus (seapek)

Net-Metering is an agreement where people who generate electricity through photovoltaic panels in Cyprus, get a deduction on their electricity bill. If the generation of electricity exceeds the consumption, the excess will be calculated for a reduction on the following electricity bill. However, if the consumption is more than the generation of ...
