Many devices from EASUN; and many many others based on the chinese solar inverter with a rj45 jack and usb port, primary identified by the display; Take a look at the device list in the wiki; Main screen: Settings: Config: How to use: flash your ESP8266 (recommended Wemos D1 Mini) with our Flash2MQTT-Tool or with Tasmotizer;

SRNE/Easun SMX-II ESPHome configuration Raw. battery-bms-invertor.yaml This file contains bidirectional Unicode text that may be interpreted or compiled differently than what appears below. To review, open the file in an editor that reveals hidden Unicode characters. Learn more about bidirectional Unicode characters ...

Hi, this inverter I am trying to configure the esphome-smg-ii package via esphome from homeassistant, I directly inserted the content of the esp8266-example.yaml file into ...

ESPHome component to monitor and control a pipsolar inverter via RS232 - GitHub - syssi/esphome-pipsolar: ESPHome component to monitor and control a pipsolar inverter via RS232. ... (exactly a clone- Easun IGridSV-IV5.6KW) and a free raspbery py 3 so I could try your setup on my configuration. I need an image of your inverter py card - maybe on ...

Hi everyone! I"ve successfully connected the JK-PB2A16S-20P (via CANbus, for reference, I"m currently connecting via the LI4 program, and you need to select UART1 Protocol no. 6 - Growatt), and now I"m looking for a way to connect something else instead of the WiFi dongle for the ISolar-SMG-II-4KW-24V-WIFI inverter.

Full funcion gateway for getting and settings values via serial port between voltronics inverters and Home Assistant. After flash via Xloader to Arduino Mega 2560, please load default settings, by connecting pin 40 and GND and restart arduino. Default ip adress is 192.168.0.122, default logins are user/user or admin/admin. In webinterface, set MQTT ...

Hast du einen Linux-Rechner zur Hand, auf welchem du per pip3 Install esphome das PyPi-Package installierst. Auf diesem kannst du per esphome run example.yaml eine Konfiguration bauen, compilieren und

flashen. Per esphome log example.yaml kannst du durchs Netzwerk aufs Logbuch der Node schauen. Hier solltest du Logmeldungen der ...

Peak Power Tracking: Harness solar energy most efficiently with 100% MPPT technology that intuitively tracks the maximum power point. Intelligent DSP Core: A sophisticated DSP controller sits at the heart of the system, delivering high performance and stability. Smart Voltage Recognition: Automatically discerns and adjusts to the connected battery"s voltage ...

ESPHome component to monitor and control a pipsolar inverter via RS232 - GitHub - syssi/esphome-pipsolar: ESPHome component to monitor and control a pipsolar inverter via RS232 safiullahtariq (Safiullah Tariq) February 23, 2022, 1:07am

Czesc ! Na wstepie powiem ze jestem poczatkujacy w HA wiec prosze nie bic :-D Mam nastepujacy problem : Jest sobie Home assistant z postawionym brokerem MQTT + Bridge do Supla Do brokera mqtt wysyla ...
