Djibouti energy consultancy

Does Djibouti have solar energy?

Djibouti has significant solar energy potential,with an estimated average daily global horizontal irradiance of 4.5 to 7.3 KWh per sq metre across its territory. The construction of the first large-scale solar generation project began in November 2022 in the Gran Bara Desert,which is located in the country's southern region.

How can Djibouti achieve its energy goals?

Djibouti's substantial potential for geothermal electricity generation, along with its rising capacity to produce energy from wind and solar power plants, should help the country reach its goals in coming years. In addition to the growing need for generation capacity, the expansion of renewable energy is key for Djibouti to diversify its economy.

Will Djibouti become the first African country to meet 100% electricity demand?

The authorities have announced plans to transform Djibouti into the first African country to fulfil 100% of its electricity demand from clean energy sources by the close of the plan in 2035. The Ministry of Energy and Natural Resources formulates policies for the sector and regulates the electricity market.

What is the Djibouti office for geothermal energy development?

The Djibouti Office for Geothermal Energy Development (Office Djiboutien de Développement de l'Energie Géothermique,ODDEG),directly overseen by the presidency,is charged with developing the country's geothermal energy potential. ODDEG was set up in 2013 to expand and operationalise the sector.

How much electricity does Djibouti produce in 2021?

Djibouti produced 654,062 MWhof electricity in 2021,according to figures from the Central Bank of Djibouti,representing a 4.3% increase relative to 2020. Improving domestic energy production will require the government to direct private investment towards electricity generation.

How does Djibouti produce electricity?

This is mostly supplied by thermal power plantsthat utilise oil and diesel as fuel. The two primary plants in Djibouti City have a combined generation capacity of roughly 122 MW,with two smaller plants located in Obock and Tadjoura.
