Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS). The Comisión Nacional De Energia (CNE) of the Dominican Republic announced the start of work on the Dominicana Azul solar project shortly in late December (22 December).

Standalone batteries are the same physical batteries used in solar plus storage systems and add-on battery systems, which are now able to charge from the power grid. They take the same amount of time to charge from the grid as they do from solar: about eight hours for a 13.5 kilowatt-hours (kWh) battery.
