A UPS (Uninterrupted Power Supply) is a backup battery that keeps the equipment plugged into it running in the event of a power outage. It"s not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don"t shut down.

I was wondering about buying an uninterruptible power supply, so if the fuse goes, the PC will have power for long enough for me to get downstairs and flip the fuse back, or in case of need, power the PC down gracefully. Spent far too long researching this, and have gone round in circles. Main problem is that I don"t trust any reviews I"ve seen.
