Dubai energy company Haiti

What kind of energy does Haiti use?

This page is part of Global Energy Monitor 's Latin America Energy Portal. Haiti relies on a mix of imported oil and domestic biofuelssuch as wood and sugar cane for its total energy supply. As of 2020,more than 90% of electrical generation in Haiti was derived from fossil fuels and less than 10% from renewables.

Why is Haiti struggling to modernise its energy sector?

Haiti's recent battles to modernise its energy sector serve as a stark lesson for how fraught the business of energy transition can be. In the wake of the scandal,the struggle to provide Haiti's 11 million people with reliable energy - and the desire to attract foreign investment to do so - has taken on an evermore politically charged hue.

How many people in Haiti have electricity?

About 49%of the population of Haiti had access to electricity as of 2022. In rural areas,that number is closer to 2%,and while 80% of Haiti's urban areas have access to electricity,that access may not be reliable. "Even when a household is connected to the power grid,they might only have power for three to eight hours a day."

How can Haiti improve energy resilience?

In the face of these obstacles, Haiti is forging a path toward energy resilience with support from USAID and the National Renewable Energy Laboratory (NREL). Central to this effort is the development of energy modeling frameworks and trainings, microgrids, agrivoltaics, and off-grid solar power to enhance energy resilience and security in Haiti.

Can private investment help solve Haiti's energy crisis?

"We have had this energy crisis for a long time,more than 20 years," says Evenson Calixte,managing director of Haiti's Autorité Nationale de Régulation du Secteur de l'Energie (ANARSE),the nation's energy regulatory authority. "And we believe that one element that can help reform this sector is private investment."

How can agrivoltaic solutions improve energy production in Haiti?

Through research and stakeholder engagement, USAID and NREL published a framework to adapt agrivoltaic solutions for minigrid contexts in Haiti. These solutions aim to boost energy production, thereby addressing energy poverty, and increase agricultural yields, thereby addressing food insecurity.
