Ecuador cegasa battery

What is a Cegasa E/Bick ultra175 battery?
The E/Bick Ultra175 is Cegasa's answer to installers looking for a pre-installed and self-manageable "plug and play" battery. It's ideal for replacing lead-acid batteries in existing installations,as well as for new self-consumption and off-grid installations with requirements from 13 kWh to 80 kWh.

How many kWh is a Cegasa ebick battery?
Each Cegasa eBick battery module is 13.5 kWh,approximately 280Ah at 48V (52.2V maximum). The allowable charge and discharge rates are managed automatically by the Cegasa BMS and GX device. Temperature effects on charge rates should be considered in the design stage in hot and cold climates.

How long does a Cegasa battery last?
The exclusive LFP (LiFePO4) technology that CEGASA incorporates in its Lithium-Ion batteries guarantees the highest number of cycles on the market,reaching a useful life of up to 15 years in intensive work conditions and 25 yearsin normal conditions. 04. Control electronics and BMSs designed in house

What makes Cegasa a good battery?
Cegasa's unique formulationmakes it possible to offer an exceptionally energy dense battery. Up to five times more energy in the same space and up to eight times longer life. Thanks to the high stability of the output voltage regardless of the discharge state of the battery,we can utilise the battery's energy to the fullest. 02.

What is Cegasa ebick ultra 175?
On sale! The new Cegasa battery eBick Ultra 175 of 48V and 280Ah is Cegasa's answer to installers looking for a pre-installed and self-manageable solution,"plug in and ready". It is ideal for replacing lead batteries in existing installations,as well as for new self-consumption and off-grid installations with requirements from 13 to 54 kWh.

Can I use a GX device with a Cegasa battery?
Both Cegasa and Victron will be reluctant or even refusing to give support to systems that are not sized according to the minimum battery configuration table. It is essential to use the BMS-Can connectionof a GX device with the Cegasa batteries for the communication of charge and discharge limits,error codes and state of charge.

The new Cegasa EN6 1.5 volt battery is doing a fine job of powering my 87 year old BUllE electromagnetic clock. I had to do a restoration on my clock, and the Cegasa EN6 battery ...
