Electric power backup Montenegro

Where is electricity produced in Montenegro?
The majority of electricity in Montenegro is primarily produced at the Pljevlja coal-fired Thermal Power Plant and the Perucica and Piva Hydropower Plants\. The core activities of the majority state-owned Electrical Power Company of Montenegro (EPCG) are electricity generation,transmission,distribution,and supply.

How does Montenegro utilize its hydro power?
Montenegro currently uses only approximately 20 percent of its hydro power potential. To fully develop this sector,Montenegro needs to upgrade its transmission and distribution network. The most important development project in the transmission systemwas the construction of an underwater electricity cable to transport the power to and from Italy. Montenegro will need to continue investing in its hydro power infrastructure to increase its usage and export capabilities.

Where in Montenegro are solar power plants most popular?
Solar power plants are most commonly found in areas of Montenegro with the highest solar radiation,such as the areas around the cities of Bar and Ulcinj,and in the area around the capital city of Podgorica.
