Why is North Korea reliant on hydro power?
North Korea is reliant on hydro power,which leads to shortages in winter,when there is little rainfall and ice blocks the flow of rivers. Power plants that were never completed/started up are shown in Salmon Allegedly fails to generate power at full capacity due to harsh weather.

Does North Korea have a oil refinery?
North Korea has a smaller oil refinery,the Sungri Refinery,on its Russian border. The country had been able to import oil from China and the Soviet Union for below market prices,but with the end of the Cold War,these deals were not renewed,leading to an explosive rise in oil prices for Pyongyang and a drop in imports.

Where does North Korea import fuel?
North Korea imports jet fuel,diesel fuel,and gasoline from two refineries in Dalian,China,which arrive at the North Korean port of Nampo.

Traction batteries are used in all types of warehouse equipment (electric carts, stackers, narrow aisle stackers, reach trucks, electric forklifts), in cleaning equipment (scrubber dryers, carpet extractors) and various types of transport using an electric motor: from golf carts to water motor vehicles.
