As Enexus, our vision is to bring energy projects into action by providing services in many areas such as

companies, individuals, public or municipal institutions and organizations at every point of power generation plants, along with renewable energy sources that are rapidly developing and preferred today.

The overarching focus of Nexus Renewable was to design and develop cost effective thermal technologies and financially viable energy storage systems, creating robust solutions with inclusive distributed energy generation, distributed energy storage system and a dispatchable renewable energy system capability.

Enexus Renewable delivered its first hybrid project this year, consisting of a 20 MW solar park and a 3 MW battery system, said Iulia Meirosu, CFO and member of the company"s board of directors. She said the battery energy storage market is becoming increasingly attractive to investors looking to diversify their portfolios.
