What is a lynx power in?

The Lynx Power In contains a positive and negative busbar with 4 connections for batteries, loads or chargers and a ground connection. It is part of the Lynx Distribution system and is available in two versions, with M8 or M10 busbar. Note that M10 refers to the busbar connection joints where the modules are connected to each other.

Can a lynx shunt be connected to a Lynx class-T Power?

Note that the Lynx Shunt VE.Can is only available with M8 connections and therefore cannot be connecteddirectly to the Lynx Class-T Power,which has M10 connections. Then,single,multiple or a combination of Lynx Distributor modules and/or Lynx Power In/Lynx Class-T Power In modules are added.

How do you Power a Lynx system?

Connect all positive wires. Power the Lynx system by connecting the positive battery pole(s). 6. Commissioning the Lynx Power In Check polarity of all DC cables. Check cross sectional area of all DC cables. Check if all cable lugs have been crimped correctly. Check if all cable connections are tight (don't exceed maximum torque).

What is a lynx distribution system?

The Lynx Distribution System The Lynx Distribution System is a modular busbar systemthat incorporates DC connections,distribution,fusing,battery monitoring and/or Lithium battery management. For more information,see the DC Distribution Systems product page.

How do I connect my Lynx battery?

Positive connections Before making any positive connections, ensure the positive wires are not powered. Disconnect all positive cables from the battery before connecting them to the Lynx module. This to prevent accidental short circuits. Connect all positive wires. Power the Lynx system by connecting the positive battery pole(s).

Do Lynx batteries need to be connected to the right side?

If the Lynx System contains a Lynx Shunt VE.Can or Lynx Smart BMS,the batteries always have to be connected to the left sideof the Lynx System and the rest of the DC system (loads and chargers) connect to the right side. This so the battery state of charge can be correctly calculated. The Lynx modules can be mounted in any orientation.
