Etk energy Mauritius

How does Mauritius generate energy?
Mauritius generates energy through various means including wind farms,solar energy,biomass,wave,and waste-to-energy projects. Currently,bagasse (sugarcane waste) is the leading source,contributing 13.3 percentto the renewable energy generation. Mauritius derives other renewable electricity from hydro,wind,landfill gas,and solar.

How has the Mauritian government changed the energy sector?
The Mauritian government has made significant changes in the energy sector. In particular,it created the Mauritius Renewable Energy Agency (MARENA) in 2016 to promote the use of renewable energy in Mauritius.

Does Mauritius need a battery energy storage system?
Mauritius aims to increase the share of renewable energy sources in its energy mix,which leads to fluctuating power injection. To reduce this fluctuation from variable renewable energy sources,the installation of Battery Energy Storage Systems (BESS) is required.

Does Mauritius use solar energy?
Mauritius has an attractive potential for solar energy,with an average annual solar radiation value of some 6 kWh/m2/day. Solar photovoltaic (PV) energyis an option due to the almost year-round intensive sunlight. To achieve the target of 60 percent renewable energy by 2030,Mauritius has commissioned six more solar farms.

Who installed the solar PV farm in Mauritius?
Siemens France installed the solar PV farmin Mauritius. The finance minister also announced plans to increase the capacity of the solar PV farm at Henrietta from 2 MW to 10 MW; the CEB subsequently launched a tender for an 8MW ac solar PV farm project valued at $8 million.

Are there integrated photovoltaics in Mauritius?
According to MARENA,there are currently no building integrated photovoltaics in Mauritius. Energy efficiency is now one of the main criteria in the design of public buildings and in rental of private buildings. The Green Building Council Mauritius was set up in 2009 to promote green building and is a member of World Green Building Council.
