Evyon battery Argentina

What is evyon battery energy storage?
Evyon provides a modular DC battery energy storage solutionbased on repurposed EV batteries for system integrators to integrate into a range of solutions. Scalable to fit your needs. Online-connected to maximize safety,performance,and longevity.

Who makes evyon industrial batteries?
Evyon Industrial is built using batteries from a leading German car manufacturerto ensure our systems are of the highest quality and safety in the industry. In addition to the battery cells themselves,Evyon uses a well-proven BMS from a manufacturer with more than 15 years of experience.

Does evyon use repurposed EV batteries?
Sustainability Evyon uses only repurposed EV battery modules,which reduces the carbon footprint by up to 85% compared to new systems. Quality Evyon Industrial uses brand-new,Tier 1 EV battery modules from a leading German car manufacturer and a BMS based on 15 years of experience.

What does evyon do?
Evyon exists to maximize the value of every battery for a fully renewable future for everyone. This we do by combining cutting-edge battery intelligence with the industrialization of repurposing,making repurposed battery systems both financially and environmentally sustainable.

Does evyon have a battery cloud?
Evyon's solution includes a "Battery Cloud",an online platform where users can monitor their own battery system. This gives real-time and historical insight about the system,such as voltage and current. "Using our Battery Cloud,users can be sure that the batteries are safe and reliable for their entire lifespan," says Erdal.

What is evyon industrial?
Connectivity Evyon Industrial is connected to our Battery Cloud 24/7, allowing a safer, better performing and longer-living battery system. Evyon Industrial is designed, built, and supported from the Nordics. Our team of engineers and battery experts is based in Oslo, ready to support any request on short notice.

Reuse + Recycling = Maximum value generation from every battery. At Evyon we are developing a proprietary hardware + software ecosystem to convert discarded EV batteries into long-lived, high-quality ...

Jørgen Erdal - Co-founder & CEO of Evyon - is proud to have delivered yet another sustainable energy storage system: "This is yet another win-win for the customer and ...

Thanks to the strong support of Evyon"s partners and investors, Evyon has been able to deploy its mission -- to enable the reused battery revolution -- by building ...

Evyon partners up with the Norwegian Research Centre (NORCE) ... more sustainable battery production, and the reduction of climate footprint. Batteries play a key role ...

Max Spencer recently joined Evyon as the Head of Product. Prior to joining our team, Max held a variety of R& D senior management roles in a career spanning about 18 ...

Evyon repurposes second-life EV batteries into green battery systems for residential and commercial use. The battery systems can be used for a wide range of stationary storage applications, from peak shaving to storage ...

Evyon"s proprietary hardware and Battery Cloud ecosystem enable the conversion of spent EV batteries into top-quality, high-value, and plug-and-play battery energy ...

Evyon will supply M øller Eiendom with a 200 kWh industrial BESS plus Energy Management System (EMS) that will control the charging and discharging of the battery for ...

Evyon exists to maximize the value of every battery for a fully renewable future for everyone. This we do by combining cutting-edge battery intelligence with the industrialization of repurposing, making repurposed battery systems both ...

Evyon | 4,372 følgere på LinkedIn. We exist as a company to maximize the value of every battery to accelerate into a fully renewable future for everyone. | Evyon exists to enable maximum ...

Evyon"s proprietary hardware and Battery Cloud ecosystem enable the conversion of EV batteries into high-quality, affordable, and plug-and-play battery energy storage systems. Towards 2030, ...

To Evyon, the Battery Cloud is a key tool to further extend the understanding of how second-life batteries perform and how to maximize their value to customers. By collecting ...

This means that when one battery in a pack nears the end of its lifespan, other parts of the pack may still have a significant remaining lifespan. "If a portion of the battery pack stops working, ...

Evyon"s proprietary hardware and Battery Cloud ecosystem enable the conversion of spent EV batteries into high-quality, affordable, and plug-and-play battery energy ...

We are honored to have our Battery Scientist Amund Raniseth being awarded support by Forskningsrådet (the Research Council of Norway) to pursue an industry-PhD in ...

5. How do you support Evyon in your role as a Battery Scientist? "I am leading the development of our analytics/data-driven platform. In this scenario, I am providing battery ...

Evyon can deliver its battery systems in three to four months, compared to six to nine months for new battery systems. MARKET POTENTIAL. Powering up the stationary battery market. Evyon is a dynamic new player in ...

Evyon has joined forces with Batteriretur to maximize the value of spent industrial batteries together. The companies have signed a Memorandum of Understanding ...
