The Cook Islands also declared themselves unaligned - to crucially prevent US warships from visiting. Today, the Cook Islands are facing the existential threat of climate change. This is with ongoing diplomatic issues like over-fishing in the Pacific. Colonialism didn"t strip the Cook Islands of its culture to the extent that it did elsewhere.

In contrast, the far-flung Cook Islands are much less commercialized, and they feel more remote, rustic, and authentic. Don"t expect to find a McDonalds in the Cooks! In fact to give you a scale of difference, the Cook Islands population is under 20,000 (and the capital city has just 5000 people), whilst Fiji"s population is 900,000!

A reconnaissance trip to the northern group has given contractors the chance to meet the very people who will benefit from a new solar energy project. Trip north paves the way for solar project - Cook Islands News
