Gilkes Energy launches first pumped storage hydro "PSH" project The Earba Storage Project is a proposed pumped storage hydro ("PSH") scheme with an installed capacity of up to 1,800MW and stored energy of up to 40,000 MWh ...

New trends are re-shaping the energy industry and the role of energy efficiency is likely to keep growing. An investment in energy efficiency creates significant commercial, operational and environmental benefits by decreasing fuel costs, increasing the efficiency of operations, lengthening the lifecycle of a plant, and reducing emissions.

Awarded in May 1997, the MTPS block extends over more than 5,000 square kilometers, with water depths ranging from 1,300 to 3,000 meters. Through its subsidiary Total E& P Congo, Total is the operator with a 40% interest, alongside partners Eni Congo (30%) and Esso Exploration and Production Congo (Mer Tres Profonde Sud) Limited (30%).

The Puma Energy Africa Graduate Program is a one-year rotational program for fresh graduates to accelerate their learning across the business, with rotations in Supply, Operations and Retail. At the end of the 12 months, successful candidates will be offered a permanent job offer with Puma Energy, depending on their identified competencies.

Gilkes Energy and SSE announce joint plans to progress the Fearna Pumped Storage Hydro project Gilkes Energy and SSE have announced plans to progress a new pumped storage hydropower scheme at Loch Fearna in Scotland"s Great Glen. The Fearna Pumped Storage Hydro (PSH) project is located at the western end of Glengarry around 25km west of ...

Ganz EEM (Hungary) has entered a formal agreement with International Energy Company, LTD (Georgia) for the supply of container-installed small hydropower plants. According to the contract, the company is to procure a pilot plant (that is to be delivered in the first half of 2017) and then several more small hydropower plants with a design ...
