Greenland solar home system

A typical solar system consists of solar panels (which absorb sunlight), inverter (which converts DC into AC), mounting structure (that hold the panels in place), batteries (to store the extra power generated), grid box and balance of systems (wires, nuts etc.). A solar system comes in various sizes like 1 kWh, 2 kWh 3kW, 5kW, 7.5 kW, and 10kW.

You are not required to purchase your own land, create your own system, or manage the grid connection. Circle will do all that for you. In addition, Greenland Solar is making its unique in-house collateral-free solar financing available to customers of solar parks. This will make it simple and quick to switch to a lot of clean, low-cost solar ...
