# Guinea licitti battery box

What is licitti heavy duty battery box?

GET A FREE QUOTE! Los Angeles & Germany in stock!!! LICITTI heavy duty battery box allows you to turn a regular deep-cycle battery into a convenient portable power station, or create a simple dual battery setup using either a DC-DC charger or our optional 50A Voltage-Sensitive Relay (VSR) and Dual Battery Wiring Kit.

What is a heavy duty battery box?

Heavy duty battery box is the innovative solution to turn a battery into a portable power station. Pre-wired all parts and connnections with design of plug &play setup,making it easy to install and use without any electrical expertise.

Does licitti have AC chargers?

All the Licitti provides for AC charging is a selection of plugs that you can connect the charger of your choice to. You can get an AC charger from them as an option,that's what I got. Any other charger will work as long as you've got the Anderson plug on there. Where are the manuals,for this and other models?

What type of batteries can a battery box handle?

It is suitable for a range of battery types including AGM,Lithium,Wet,Gel and Calcium,and can handle batteries up to 330mm (l) x 180mm (w) x 240mm (h) in size. Constructed of durable ABS plastic and meeting the UL 94V-0 standard for flammability of plastic products,this battery box is a high-quality unit that will last for many years.

Does licitti Charger overcharge?

A good charger won't overcharge. All the Licitti provides for AC charging is a selection of plugs that you can connect the charger of your choice to. Good thing. But only one main switch. If it's on,the inverter runs and takes energy. A second power switch for the inverter would be good. The inverter has its own off/on switch.

Box / DC Control Box DC ...

I own, like, and use two of the 1000w. I think the Licitti design is great for some people but not for others. I too suggest checking out the older threads, but will point out that since I bought my Licitti"s most of the major-brand portable power stations have dropped dramatically in price and gained longer warranties while the Licitti hasn"t.

The video was about the Licitti 1000w model, so I assumed that he was talking about the larger 2000w model. This is a quote of what the commenter said, "It has been confirmed that you can fit TWO of the new "mini" 100AH batteries into this large power box, doubling your capacity while still using drop-in replacements.

It looks to me like a fisherman"s battery box with a solar controller and inverter added. For many years now

fishermen have enclosed their trolling motor batteries in rugged, heavy-duty and specialized "battery boxes" that are often festooned with Anderson, USB, and cigarette-lighter-type power connections.

I did quite a bit of research, got quotes from installers and it got really overwhelming and expensive. This setup is definitely not cheap. $800 for the box, $30 for the tray, $100 for the wiring (used code "WELCOME10" for 10%off) and another $620 for the battery.

ChangeMoore fridge/freezer (with the add in tiny battery) and it ran at -4/37df for 2.5 days just on the battery alone which is great and had half life left on the internal battery. Testing the Changemoore with an EB70s showed that a 200 watt panel will pretty much keep up with the ChangeMoore during most mixed weather and that a 100 watt panel ...
