Are Irish households bigger than European households?
Commenting on the report,author Dr Rachel Slaymaker of the ESRI stated: "Households in Ireland headed by over 65s are similar in size to their European counterparts. In contrast,middle-aged and particularly younger households are typically larger in Ireland".

What expenses are included in a household survey?
Expenditure on Housing includes rent, mortgage, home insurance, local property tax, refuse, maintenance products and services, and capital improvements. The changes in regulation across household surveys introduced by Regulation 2019/1700 result in a re-definition of a household.

What is the European Social Survey's Research Ethics Board (REB)?
The European Social Survey (ESS) is inviting five external members to join its newly established Research Ethics Board (REB). A key aim of the ESS has always been to implement high quality standards in its methodology and to improve standards in the field of cross-national surveys more generally.

Why does Ireland have a high average household size?
Key findings: Ireland has a high average household size on a cross-country basis and this pattern has remained over the past 20 years. This finding is strongly influenced by demographics,with a high fertility rate,younger population and thus a high share of households with childrenimportant factors in explaining the cross-country trends.

How will household income change in Ireland over 2021-2040?
The number of households is set to increase moderately in Ireland over 2021-2040, with couples with children remaining the dominant household type. While household earnings will only gradually reach pre-pandemic levels, the fastest household expendit ... Read More Delivery :

How will Ireland's household size change over time?
In terms of policy implications,Ireland's relatively high household size will likely persist as long as favourable demographic features are present (such as a high birth rate and young population) compared to other countries. Household size is likely to declineover time in line with population ageing.

The number of households is set to increase moderately in Ireland over 2021-2040, with couples with children remaining the dominant household type. While household earnings will only gradually reach pre-pandemic levels, the fastest household expenditure growth is set to be driven by single person households.

The HBS is a survey of a representative random sample of all private households in the State. HBS surveys have been carried out periodically in Ireland since 1951. The main purpose of the HBS is to determine in detail the pattern of household expenditure in order to update the weighting basis of the Consumer Price
