Industrial enclosures Bouvet Island

What is an industrial enclosure?

Enclosures may come in standardized dimensions or shapes which can be stacked for assembly, or they can be custom built to particular specifications. The amount of protection and durability an enclosure offers depends largely on its material composition. Most industrial enclosures are made from materials classified as either metals or polymers.

What makes a good industrial enclosure?

The amount of protection and durability an enclosure offers depends largely on its material composition. Most industrial enclosures are made from materials classified as either metals or polymers. Metals generally exhibit higher conductivity to both heat and electricity than other material types.

What are the requirements for industrial enclosures?

Industrial enclosures must adhere to certain specifications and standards. Standards such as CSA C22.2 No 94-M91 discuss special purpose enclosures for industrial products,while ASSE 1060 describes performance requirements for outdoor enclosures for fluid conveying components.
