Inteq energy Guinea

What are the main energy sources in Guinea?
Three primary energy sources make up the energy mix in Guinea: fossil biomass,oil and hydropower. Biomass (firewood and charcoal) makes the largest contribution in primary energy consumption. It is locally produced,while Guinea imports all the petroleum products it needs.

What is the electricity system in Conakry Guinea?
The Electricité Nationale de Guinée(National Electricity Company of Guinea) is responsible for all production and distribution of electricity in the country. However,service is poor; even households in Conakry are served less than 12 hours a day.

What is the potential for hydroelectric power generation in Guinea?
The potential for hydroelectric power generation is high,but largely untapped. Electricity is not available to a high percentage of Guineans,especially in rural areas,and service is intermittent,even in the capital city of Conakry . The estimated 2012 national consumption was 903 million kWh.

When will Eni start drilling?
Future drilling will be carried out by the Saipem 10000 rig,which has already developed the field. ENI then hopes to deliver its first barrels as early as 2023,and expects to produce 15,000 bpd in less than two years,then reach the plateau phase (110,000 bpd) between 2025 and 2026 (AI,12/11/21).
