Solar water pump system - technical outline A solar energy-powered water pump is a water pump running on the electricity that is generated by solar photovoltaic modules. Using solar energy as power source, such solar water pumps ...

Our system is designed for outdoor application in un-electrified remote rural areas. This system is an ideal application for campus and village street lighting.

A solar battery stores the excess energy which is generated by your solar panels or wind turbines. This energy can then be used during times when there is little sun or wind. We stock a number of different solar batteries.
