Kiribati quixotic systems

What is Kiribati doing to protect the Pacific Ocean?
Regionally,Kiribati has made significant commitments toward the protection of marine resources in the Pacific Ocean,the largest of which is the declaration of the 405,755 km 2 Phoenix Islands Protected Area and World Heritage Area.

Does Kiribati have conservation management?
The remaining Kiribati islands,including all of the Gilbert Islands have no ongoing active conservation management. Thirteen of the 21 sites have recently been identified as Important Bird Areas (IBAs) by BirdLife International and Conservation International (Gupta 2007).

Does Kiribati have a rapid urbanisation problem?
The population of Kiribati has quadrupled from around 30,000 in 1950 to more than 120,000 in 2020,and is set to double again by the end of the century (Kiribati National Statistics Office,2015; World Population Review.,2020). This has led to a multitude of problems associated with rapid urbanisation. 5.1.

Does Kiribati have a 'transported landscape'?
Human adaptations to these coastal,lagoonal,and sea environments (although not without environmental consequences in themselves) can be seen all over Kiribati,in the ubiquity of these "transported landscapes"(Kirch 1982).

What is Kiribati doing to protect endemic species?
Species conservation is also a priority, focusing on the protection of endemic species found solely in Kiribati. These species are particularly vulnerable to threats such as habitat destruction and the introduction of invasive species. Efforts to control and eradicate invasive species play a crucial role in safeguarding native biodiversity.

Is ciguatera poisoning a problem in Kiribati?
The main threat to Kiribati's coastal fisheries is the use of destructive fishing methods and fishing effort exceeding the available resources. Ciguatera poisoning poses a significant threat to human healthand has been reported as early as 1978 (Beets,2000).
