We are achieving this by electrifying our uses of energy, by using existing infrastructure and technologies smartly, and by rationalising our energy consumption. Our approach: we are an independent energy producer. We own and operate a portfolio of facilities that generate decarbonised, resilient and local energy that we sell to our clients.

The research leaves little room for doubt that energy teleportation is a genuine quantum phenomenon. "This really does test it," said Seth Lloyd, a quantum physicist at the Massachusetts Institute of Technology who was not involved in the research. "You are actually teleporting. You are extracting energy." Quantum Credit
