How many solar power plants are in Laos?
VIENTIANE,Feb. 1 (Xinhua) -- A total of 58 solar power plantshave been completed or under construction across Laos with a total installed capacity of 7,656 MW,local daily Vientiane Times reported on Tuesday. Eight of these plants have been completed and 50 are under construction,said the report.

Why is solar power important in Laos?
Solar power has improved the livelihoods of local people. For people living off-grid in remote villages in Laos,solar energy offers a clean,sustainable way to bring electricity for all,and the promise to transform their lives.

How can solar energy help people living off-grid in Laos?
For people living off-grid in remote villages in Laos,solar energy offers a clean,sustainable way to bring electricity for all,and the promise to transform their lives. For people living off-grid in remote villages in Laos,solar energy offers a clean,sustainable way to bring electricity for all,and the promise to transform their lives.

How much power will Laos have?
Of this amount, 77.59 percent will come from hydropower and the rest will come from solar, wind and coal-fired power plants, said the report. Laos' capacity for solar power is expected to range from 10,000 MW to 15,000 MW, while wind power potential is estimated at about 100,000 MW, according to the report. ?

How much electricity will Laos produce by 2030?
These developments will support government efforts to increase the amount of energy exported and minimize the amount of electricity re-imported from neighboring countries in the dry season. By 2030,it is planned that Laos will produce another 5,559 MWof electricity.

What is Sapp solar power project?
The SAPP Solar Power Project is the first utility scale solar PV power plant in Lao PDR. Learn more about the project.
