Latvia bali solar panels

How many solar panels are installed in Latvia?
As of June 2023,the number of solar panels installed by the Latvian population and connected to AS "Sadales tikls" reached 15,000 units,and their total capacity exceeded 120 MW - about 15% of the total electricity consumption in Latvia on a sunny day. Solar panels have a lifespan of more than 25 years.

How long do solar panels last in Latvia?
Solar panels require almost no maintenance during their lifetime. In addition,rain cleans the surface of the panels well. The payback period for correctly adapting to the consumption of solar panels is 4-7 years. Why are more and more people in Latvia installing solar panels and inverters?

How much sunlight does Latvia receive a year?
In our climate,one square meter of surface receives an average of 1200 kWh per year from the sun. The duration of direct sunlight in Latvia exceeds 1800 hours. The new type of solar panels produces energy with the so-called scattered radiation,which exists around us for 4000 hours.

Bought 8 motorized Bali solar shades with medium cassete valences. Six were outside mount shades for two sliding glass door units. Each sliding door unit had 2 sliding doors opening from the middle and a fixed panel at each end. I sized the center shade for the two moving doors and the left and right shade for the fixed outer panels.
