Liechtenstein: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

For more than 100 years, Sims Limited has been at the center of the circular economy by recovering and recycling products and materials to generate maximum value and minimise waste.
