Macao opium battery

By 1830s one third of all lethal poisoning was due to opium-marking the first recognition of a social evil. Isolation of Morphine from opium by Serterner in Germany in 1805, hypodermic syringe by Pranez in 1850s, synthesis of morphine by Tschudi in 1952, and manufacturing of synthetic derivatives-called opioids and Heroin eased the use.

Opium is a highly addictive narcotic drug obtained from the juice (latex) of the unripe seedpod of the poppy plant (Papaver somniferum). The latex requires minimal processing before it can be consumed. The traditional practices of latex processing vary from place to place and may include air-drying, heat-drying, or boiling (DEA, 1992, 2020a; Ray et al., 2006).
