Mgm solar panels Tunisia

How much solar energy does MGM use?
In total,solar energy produced from the MGM Resorts Mega Solar Array provides approximately 40%of total energy use (day and night) for MGM Resorts in Las Vegas (see Figure 1).

What is MGM Resorts mega solar array?
MGM Resorts International (MGM Resorts) made significant headway on its emissions-based goals by installing a 100-megawatt(MW) solar array,referred to as the "MGM Resorts Mega Solar Array."

Does MGM Resorts use solar power in Las Vegas?
The solar power generated at the MGM Resorts Mega Solar Array feeds directly into the local southern Nevada grid and 100%of it is scheduled exclusively for use by MGM Resorts properties in Las Vegas. This coincides with MGM Resorts' decision in 2016 to transition from fully bundled to distribution-only service with the local utility,NV Energy.

How much electricity does MGM use a year?
The array generates up to 300,000 megawatt hours (MWh) of electricity annually, which is approximately 40% of MGM Resorts' current electricity use (day and night) in Las Vegas. That's enough electricity to power more than 25,000 homes' electricity annually .

What are MGM Resorts' climate goals?
MGM Resorts also joined the DOE's Better Climate Challenge in early 2021 and has established a goal to reduce their Scope 1 and 2 emissions by 50%,by 2030,from a 2019 baseline year. With the additional goals listed below,the MGM Resorts' Mega Solar Array and other initiatives are key enablers of their targets to:

Currently, MGM Resorts uses solar power for 90 percent of the total daytime needs at 11 of its properties on the Las Vegas Strip.
