"Smarter Grid Solutions is a leading clean energy management software company and we are proud to have played our part in connecting more than 400MW of renewable energy assets to the grid. Not only are our solutions being used in Europe and North America today, but we are working on ways to extend the value of our solutions to our net zero carbon transition ...

The SCADA system is expected to significantly improve operational efficiency, manage network outages more effectively, reduce network losses, and enhance cybersecurity. ...

Die Smart Grid Solutions GmbH ist ein junges Unternehmen, das die Energiemessung auf europäischer Ebene grundlegend verändern wird. Durch unser Team mit jahrelanger Erfahrung aus dem Energiebereich und vieler anderer Branchen, ist es uns möglich die aktuellen Messverfahren zu optimieren, ihre Genauigkeit der Messergebnisse signifikant zu erhöhen ...

Eleven influential factors are identified that impact on four stages for industrial consumers" adoption of smart grid solutions (inscription, translation, framing, and stabilization stages). The ...

The project aims to rebuild and extend the Perucica substation (225/110 kV) and replace two aging autotransformers at the Pljevlja substation, both crucial to the stability of ...

Utilities are now looking to use smart metering within their own organizations, as shown by the tenders, but introducing smart technology over the whole grid is still far away. In fact, the Hungarian Energy Office (MEH) canceled a tender at the end of March which called for experimental smart metering projects citing a lack of interest on the part of utilities.
