Mozambique melin energy

What energy sources are available in Mozambique?
Mozambique has abundant energy sources available for exploitation. As of 2021,the country was ranked first in energy potential of all the countries in the Southern African Power Pool (SAPP),with an estimated energy capacity of 187,000 MW. Available energy sources include coal,hydroelectricity,natural gas,solar energy and wind power.

How much solar energy does Mozambique have?
Mozambique has a potential solar energy yield estimated between 1,785 and 2,206 kWh/m2/year,resulting in a solar energy potential of 23,000GWh/year. In August 2019,the first grid-ready solar power station,the 40 megawatts Mocuba Solar Power Station,in Mocuba District,Zambezia Province,achieved commercial commissioning.

How can Mozambique contribute to a green energy transition?
Studies have indicated that this could a 60% reduction in the country's aluminium exports and a 2.5% decrease in the country's GDP. On the other hand,Mozambique also has unrivalled natural energy resourcesthat could significantly contribute to a green energy transition,not only domestically but also in the Southern African region.

Why is Mozambique a major energy exporter?
Mozambique is a net exporter of energy to countries in the Southern African Power Pool (SAPP) - South Africa being the largest importer. The government view energy exports as a key driver of the Mozambican economy, having passed a new electricity law that simplifies permitting and encourages IPPs activities.
