# North Macedonia solar eko energia

Which energy sources are used in North Macedonia?
At the moment,most of the electricity in North Macedonia is produced from thermal power plants with coalas the primary energy source. The share of the renewable energy sources in the total installed capacity in North Macedonia is 38%,with most of the renewable energy coming from large hydro powerplants.

Does North Macedonia need electricity?
Although North Macedonia's renewable energy potential is huge (especially solar),the country is still dependent on importing electricity-imported electricity constitutes around 30% of the overall gross consumption.

How many solar plants are there in North Macedonia?
This is a huge number for North Macedonia as the biggest solar plant at the moment is only 17MW, with the second biggest being 10MW. According to the RKE 2022 Annual Report, 267 new renewable energy power plants are currently in the works (with solar plants having the biggest part - 254 plants).

Who built the first solar plant in North Macedonia?
The 10MW solar plant,built on the site of the spent Oslomej lignite coal mine,was constructed by the public company JSC Elektrani na Severna Makedonija(ESM). This is the company's first solar plant in North Macedonia,developed with a view to diversifying energy sources and supporting decarbonisation.

How will a new solar plant help Macedonia?
Andi Aranitasi,EBRD Head of North Macedonia,said: "The new solar plant will help the country,which faces severe air pollution from coal,to reduce its reliance on ageing coal-fired infrastructure. It will also generate cheap electricity in times of very high market prices.

Should North Macedonia accelerate the transition to renewables?
Like others in the region,North Macedonia must balance its need to rapidly accelerate the transition to renewablesto secure its energy future with the need to ensure that future is one where both the country's nature and people thrive.

Only 2.75% of North Macedonia"s electricity consumption last year was covered with imports, a drop from more than 30%, registered in 2021, as new photovoltaic capacity soared 251% year on year, according to data from the country"s ...

08/26/2022 August 26, 2022. Using solar thermal technology to convert sunlight into heat should be a no-brainer in North Macedonia. But meager subsidies and insufficient regulation have stymied ...

Eko-svest is now trying to fill in the gaps. The NGO has been advocating for a bottom-up approach to just

transition in the coal-reliant regions since last year. Based on interviews with key stakeholders and citizens from Kicevo, it conducted an alternative economic development analysis and a feasibility study of rooftop solar photovoltaic ...
