Norwall power systems French Southern Territories

The new breed RV Generator by Next-Gen Power Systems. RV Inverter technology for superior power quality; less noise; and extended run time in hot weather (Death Valley--1500+ hours;) CARB/EPA Certified.

French Southern Territories, comprising of several islands in the Indian Ocean, are isolated with a harsh climate, making technology and telecommunications development challenging. The territories have no indigenous population, with only temporary French military personnel, ...

Smart Switch automatic transfer switches from Generac manage power for entire homes with the help of digital power management technology. Appliances such as air conditioners, electric water heaters, and well pumps draw high levels of current at 240 volts and can take a big bite out of the amount of power available from a standby generator.Generac"s ...

Power Management options make the most efficient use of a standby generator system. Without Power Management, two heavy loads that run at the same time and overload the generator will trip the generator"s main breaker and leave the entire house without power until someone manually resets the breaker. Power management eliminates this problem.

Most can produce more power on propane versus natural gas, but a few have the same rating. As the name indicates, they are fully automatic and turn on whenever the power shuts off, restoring power within a few seconds. When the utility restores power, the power source transfers back to the utility and the generator shuts down.
