Palestine portable generator solar

What is the potential for solar energy in Palestine?
There is high potentialfor solar energy in the Palestine,with a daily average solar radiation of 5.4 kWh/m2 which should encourage its use for mass applications like cooking,industrial and domestic heating,water pumping,rural electrification,desalination etc.

Is Palestine a good place to invest in solar energy?
Palestine has some of the highest rate of solar water heating in the region,and there are a number of solar power projects. A number of issues confront renewable energy development; a lack of national infrastructure and the limited regulatory framework of the Oslo Accords are both barriers to investment.

How many homes in Palestine use solar energy heaters?
Over halfof all households in Palestine utilise solar energy heaters,although only 3% of houses depend on it as their main source. A 710kw photovoltaic plant was commissioned in September,2014 in the vicinity of Jericho; it is the largest plant in Palestine to date.

How can Palestine reduce its reliance on imported energy carriers?
Palestine can reduce reliance on imported energy carriers by deployment of clean energy systems,especially solar,geothermal and biomass. Palestinian areas has large alternative energy potential which can be harnessed by a futuristic energy policy,large-scale investments and strategic assistance from neighbouring countries like Jordan and Egypt.

Dead Sea Photovoltaic Power Generating Plant in Jericho. Renewable energy in Palestine is a small but significant component of the national energy mix, accounting for 1.4% of energy ...
