Paraguay solar system for workshop

What is the Atlas of the solar and wind energy potential of Paraguay?
The Atlas of the solar and wind energy potential of Paraguay is one of the tools developed by Itaiputo make visible data of great relevance for developers of these technologies interested in new generation projects in this country. That document reflects a promising future for solar technology.

What is the main energy source in Paraguay?
From the perspective of energy demand,the main energy source is biomass(44%),followed by hydrocarbons (40%) and,in a distant third place,electricity (16%). The main source of energy produced in Paraguay is thus the least used in the country.

Why is Paraguay a renewable country?
Paraguay has one of the highest proportions of renewable energy in South America. Hydropower constitutes around 99.5% of the installed electricity capacity. This makes it highly dependent on the rivers that feed the country's main hydroelectric plants, from where most of the electricity produced is exported to neighboring countries.

What is the energy potential of Alto Paraguay?
This map denotes considerable potential throughout the territory,with a positive trend towards the north of the country,registering maximum figures that are between 1850 and 2000 kWh /m²-year,especially between the departments of Alto Paraguay,Boquerón,Concepción,Amambay,San Pedro,Canindeyú and Alto Paraná.
