Geres Tajikistan is committed to improving people"s access to clean and efficient energy solutions in order to increase thermal comfort, decrease energy poverty and improve livelihoods. Geres Tajikistan works in the housing/construction sector, which is directly responsible for a significant part of energy consumption and CO2 emissions.

Energy efficiency With HRV Hokkaido from Passiv Energie, you are choosing the most energy-efficient ventilation system imaginable. Not only does it recover up to 95% of the heat from the exhaust air and use it to heat the supply air, it also has the lowest power consumption of all ventilation units with heat recovery.

Tajikistan: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

In October 2009, we introduced the heat recovery ventilation system "inVENTer" for the first time in Japan, as the first phase of Passiv Energy, and launched a business that contributes to reducing bad environmental impacts such as CO2, while promoting comfortable living space.

Im Oktober 2009 hielten wir Premiere für ein wärmerückgewinnendes Ventilationssystem "inVENTer", das erste System dieser Art in Japan, in der ersten Phase von Passiv Energie Japan und starteten somit ein Unternehmen, welches dazu beiträgt negative Einflüsse auf die Umwelt, wie z.B. CO2, zu reduzieren und zeitgleich komfortables Wohnen ...

A database for building energy technology products, which is maintained by Energieberatung Salzburg and is used by building owners, product manufacturers and suppliers as well as funding agencies.

Examples of passive solar energy. The best examples of passive solar energy are found in the architecture: Thick and insulated walls. They prevent heat output in winter and keep the house cool in summer. Ceilings with external ventilation. Roofs receive a lot of radiation in the summer. If they have cross ventilation, this heat dissipates.

Passiv Energie Japan pioneers sustainable energy solutions, specializing in innovative and eco-friendly ventilation technologies. Committed to a greener future, we engineer energy-efficient ...
