Pitcairn Islands tob new energy

Green News: Pitcairn"s authorities have launched a renewable energy project Photo credit: SPC/Adrien Lauranceau-Moineau Pitcairn Islands, a group of five islands with a total area of 47 km2 and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the...

The crystal-clear waters surrounding the islands allow corals to thrive at unusual depths in cooler waters, potentially enhancing their resilience to climate change and offering refuge to these vulnerable ecosystems. This remarkable endeavor was inaugurated by Iona Thomas, the Governor of Pitcairn and Britain"s High Commissioner to New Zealand.

The Pitcairn Islands (/ ... Pitcairn uses New Zealand"s international calling code, +64. It is still on the manual telephone system. Radio. There is no broadcast station. Marine band walkie-talkie radios are used to maintain contact among people in different areas of the island.

Discovery of Pitcairn Island . Captain Philip Carteret first spotted Pitcairn Island in 1767 but couldn"t land due to rough seas. He miscalculated its location, marking it miles away from its true position. Years later, Captain Cook showed some interest, but it wasn"t until the Bounty mutineers arrived in 1790 that the island gained attention.

As you sail towards Pitcairn, you approach one of the remotest of the world"s inhabited islands, lying halfway between New Zealand and the Americas. Four thousand eight hundred kilometres of open ocean separate you from them; a few archipelagos lie to the north; and the southern seas are empty to the ice caps of Antarctica.
