Backup power solutions Eaton"s mission is to improve the quality of life and the environment through the use of power management technologies and services. We provide sustainable solutions that help our customers effectively manage electrical, hydraulic and mechanical power - more safely, more efficiently and more reliably.

The charts and graphs included in this article are calculated based upon electricity cost of 10¢ per kwh @ 93% efficiency. Using this figure (which is conservative relative to the 20¢ or more common in urban areas), and comparing a traditional UPS running at 93% efficiency verses an EVR-protected UPS running at 99% efficiency at a 500kVA data center, the differential cost ...

Cutting-edge emergency power backup for the COVID-19 vaccine freezers is a must and it can only come from an intelligent, double conversion UPS system. According to the World Health Organization, as many as 50% of vaccines go to waste each year because of improper handling, including temperature control problems. ...

Your specific needs should determine your IT power decision. Selecting a UPS for your particular application requires an examination of a number of factors. The load size, location and criticality of the equipment to be protected are key, as ...

The Global Backup Power System Market segmentation by Usage is categorized into Primary Backup, Secondary Backup, Emergency Backup, and Off-Grid. In 2023, the Primary Backup segment held the largest revenue share of around 42.3%, owing to the rising demand for reliable power supply in critical applications such as data centers ...

Your specific needs should determine your IT power decision. Selecting a UPS for your particular application requires an examination of a number of factors. The load size, location and criticality of the equipment to be protected are key, as well budgetary considerations, when choosing a UPS for power backup.
