Powerful solar battery Isle of Man

The Isle of Man produces more solar than you would think, even on an overcast day, we are still reaping the rewards of free electricity! A small solar array of 8 panels can produce 3630kwhrs of electricity and this equates to an annual cost saving of £1034.55.

On a much bigger scale, plans have been submitted for the first grid-scale solar farm and battery storage on the Isle of Man to provide affordable renewable electricity to residents and businesses and help improve energy security for the island.

Each and every day our Sun emits endless amounts of power, shining right where you need it most on your home or business roof, or adjoining land. There are many reasons to tap into this otherwise wasted power.

Plans have been submitted for the first grid-scale solar farm and battery storage on the Isle of Man to provide affordable renewable electricity to residents and businesses and help improve energy security for the Island.

October 21 (Renewables Now) - UK renewables investor Cubico Sustainable Investments and its joint venture partner Peel NRE are planning to build a 26-MW solar park on the Isle of Man, set to become the first utility-scale solar farm in ...

Cost - Solar PV panels can be quite expensive to buy initially. Space - Solar PV panels do take up quite a lot of roof space compared to solar thermal systems. Wasted energy - These panels produce a good amount of energy, however they have no way of storing excess power. Unless you buy a solar battery, this extra energy will be wasted.

At Nexiom Ltd, we are experts in the installation of renewable energy on the Isle of Man, including solar photovoltaic panels (Solar PV), which can be used to power your home, leading to savings on your electricity bills and reducing your carbon footprint.

o In December 2020, the Isle of Man Government launched its Future Energy Scenarios (FES) ... Intermittent renewables are sources of generation powered by natural resources i.e. wind, tide and solar.
