As a consequence, most of these renewable energy resources remain underutilized. Regarding this underutilization, Bautista calculated that the Venezuela solar rate of use for 2012 only reached 0.000000127% of the national capacity. In reference to wind, this author considers the use of this potential as inexistent for the same year [34]. Such ...

Renewable heat. Renewables also have an important role in providing heat for buildings and industrial processes. To achieve decarbonisation and energy saving objectives, many countries are encouraging individual homes and buildings to shift from fossil fuel heating systems such as gas- or oil-fired boilers to systems like heat pumps which are much more efficient and can be ...
